

# About The Jonesi Consultancy

## *An Introductory Overview of Who We Are & What We Offer*

We help organizations bridge the gap between their people and their technology through practical, human-centered AI training and workflow automation solutions.

Founded by a Certified Public Accountant and a Licensed Clinical Social Worker, our consultancy blends business acumen with behavioral insight to equip teams with the confidence and clarity to embrace AI in their daily work. We design learning experiences that empower employees, enhance efficiency, and prepare organizations for the future of work.

### Our Approach

**From the business side,** we understand the priorities of the bottom line—efficiency, scalability, and return on investment.

**From the human side,** we recognize the anxieties employees feel around AI and design trainings that build confidence, support professional growth, and show staff how to thrive rather than fear this transition.

Our programs combine clear financial rationale with compassionate facilitation, ensuring AI integration is both profitable for the organization and empowering for employees.

### Our Services

**AI Integration Workshops:** Intensive, one- or two-day, hands-on workshops that give teams the clarity and confidence to make smart AI decisions and build a practical roadmap for adoption. These are not cookie-cutter trainings: every participant identifies and develops AI applications specific to their own role, responsibilities, and daily workflows. Each person leaves with actionable insights tailored to their work—not generic demonstrations.

**Professional AI Coaching:** One-on-one coaching engagements designed to help professionals recognize AI integration opportunities, navigate ethical considerations, and build confidence in AI decision-making.

**Ongoing Consulting Retainers:** Sustained advisory partnerships providing continuous strategic guidance, implementation support, and change management expertise as your organization navigates AI adoption.
